## THE PERFECT ROMANTIC LOCATION

### AFRICANMECCA CLIENTS RENEW VOWS AT SATAO ROCK CAMP

*Coastweek* - - AfricanMecca clients, Neal and Cheryl O'Horo recently arrived in Mombasa, Kenya from the United States to renew their wedding vows at the spectacular and panoramic Satao Rock Camp located in the Taita Ranch.

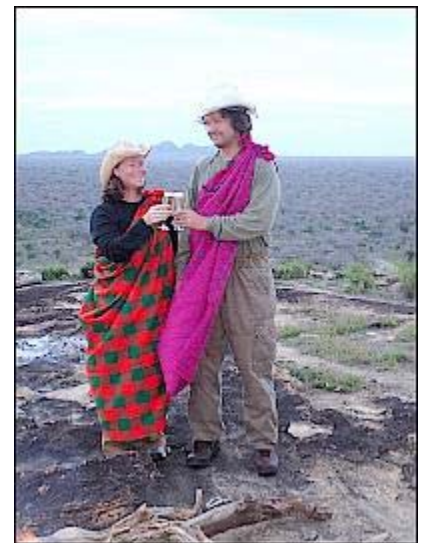

The wedding vow renewal experience was one that Neal and Cheryl wanted to be a big part of their Kenya experience.

Neal had been serving in the US Army in Iraq for 14 months prior.

The separation of the couple was very difficult during his time away from home, which made the couple realize the value of marriage and life in general.

The couple chose AfricanMecca as their Africa destination specialists with an affirmation of Kenya as the destination of choice because of the varied experiences available in one country.

AfricanMecca selected Satao Rock Camp to deliver a memorable experience that the couple would cherish and remember for years to come with the completion of this ceremony in Mombasa.

*Coastweek* - - **Neal and Cheryl O'Horo while renewing their wedding vows at the spectacular Satao Rock Camp.**

The O'Horo's were able to sample East Africa's rich and welcoming coastal culture by taking a full day Mombasa tour, experiencing the Tamarind Dhow which sets sail in the evening as well as the Wasini - Kisite snorkelling excursion.

Mombasa was also the perfect location because it provided a superb beach holiday experience with the ability to escape on a private and exclusive wedding vow renewal safari.

A spokesperson for Satao Camps commenting on the couple's experience said:

"AfricanMecca's continued commitment and effort in promoting discerning tourism is beneficial to Kenya.

"The fact that their clients come to Satao Rock Camp and Kenya from as far away as the US to create memories speaks volumes about their tourism awareness efforts to reach out to travellers.

"It says to Americans and other travellers that Kenya is a welcoming country; it is committed to safety and provides the best experience possible for any possible budgets."
